

Kingsmoor Lower School – Yearly Art overview

Art and Design offers cultural enrichment through the cultural links when learning about artists and art work from around the world. Art and Design helps to enhance the children's aspirations and ambitions, develops communication through different medium and team working skills, helps to strengthen their creativity and build son their confidence. Specialist artists visit school to model specific skills to the children. Within the curriculum the children are encouraged to explore, imagine and use creativity so that everyone is given the opportunity to flourish. The children have had their art work displayed at local venues and have taken part in some seasonal fundraising, Science Week poster design and Art competitions to allow everyone's art work to be celebrated.
